**Stephen G. Fritz : Ostkrieg: Hitler's War of Extermination in the East** before purchasing it in order to gage whether or not it would be worth my time, and all praised Ostkrieg: Hitler's War of Extermination in the East:

On June 22, 1941, Germany launched the greatest land assault in history on the Soviet Union, an attack that Adolf Hitler deemed crucial to ensure German economic and political survival. As the key theater of the war for the Germans, the eastern front consumed enormous levels of resources and accounted for 75 percent of all German casualties. Despite the significance of this campaign to Germany and to the war as a whole, few English-language

publications of the last thirty-five years have addressed these pivotal events. In *Ostkrieg: Hitler's War of Extermination in the East*, Stephen G. Fritz bridges the gap in scholarship by incorporating historical research from the last several decades into an accessible, comprehensive, and coherent narrative. His analysis of the Russo-German War from a German perspective covers all aspects of the eastern front, demonstrating the interrelation of military events, economic policy, resource exploitation, and racial policy that first motivated the invasion. This in-depth account challenges accepted notions about World War II and promotes greater understanding of a topic that has been neglected by historians.
