Frank Murray : Oxcart Convoy: How They Got To Area 51 before purchasing it in order to gage whether or not it would be worth my time, and all praised Oxcart Convoy: How They Got To Area 51:

0 of 0 people found the following review helpful. Four StarsBy CustomerVery good History2 of 3 people found the following review helpful. BLACKBIRDBy Gilbert R. SchwartzI have not finished reading this book yet and already feel it is good. I am an aircraft nut and enjoy any information I can find on virtually any aircraft. My main interest is in military aircraft and this book has that.2 of 8 people found the following review helpful. Don't bother, unless you hate your hubby.By Reva in SoCalI bought this book (and another one) for my husband because he has been a big fan of the Blackbirds since February, 1964. A few days later, he asked me if I really hated him that much!!! Very disappointed: the undated photos were either not properly captioned or just plain wrong, the writing was "childish" and unpolished, the narrative text was not organized very well, and that the two most important "convoy papers" on pages 22 and 24 were incomplete. He said that he had expected something that was much more professional and complete

from a former A-12 Project Pilot than what was published here, especially since the author holds himself out to be the Historian for the Roadrunners Internationale (whoever they are). The only favorable comment that he made was about the back cover being a pretty good summary of Project OXCART, except that only THIRTEEN A-12s were built, not fifteen. The author included the two M-21s in his total.

Pictorial account of the preparation and transportation of the CIA A-12 Blackbird from the SkunkWorks in Burbank, California to Area 51.

About the Author Author was a former Air Force fighter pilot recruited by the CIA to fly the Top Secret A-12 spyplane at Area 51 and over North Vietnam and North Korea during the Vietnam War and the North Korean seizure of the USS Pueblo spy ship.
