It made it easier to see what life was like during those early times. Before the inventions of our modern day society. good work, I want to read more.3 of 3 people found the following review helpful. Love it!By Rita JoThis book gives you the true feeling of pioneer life. The family in the book becomes your family. Looking forward to reading all of her books.0 of 0 people found the following review helpful. ExcellentBy Chaplain Stanleigh Fremont ChapinA similar narrative to many that I grew up with in a rural community with many Swedish farmers and around 100 miles distance to novel location

Popular Kansas author Linda K. Hubalek continues the story of a Swedish immigrant family in Prarieblomman, the second book in the Butter in the Well series. Homesteading the Kansas prairie in 1869, Prairblomman features the diary of young Alma Swenson, as she grows up on the Kansas prairie that her parents homesteaded. Hubalek grew up in this same house, researching the land and family that lived on the farm before her.

Prarieblomman is a tender and touching diary...Hubalek has succeeded in blowing life into both Alma and the fascinating times she lived though. Hubalek s books give Swedish-Americans a perspective on the past... --Swedish Press MagazineAfter reading this story about my mother's early years on the prairie, I realize...all our early values are linked to the history of the land where we were raised. --Alice Runneberg BohnHubalek takes the reader on a journey to another time and place with this sequel to Butter in the Well. Swedish traditions are intertwined with tidbits from Kansas history in this unique historical diary. --KANSAS! MagazineAbout the AuthorIn sixth grade we had to write a paper on what we wanted to do when we grew up. My mom had kept it and I found this paper while cleaning through my closet during my college days. According to my dreams back then, I wanted to be a farmer, but my last line was - but alas, girls can't be farmers. Well, I got my Bachelors Degree in Agriculture/Horticulture from Kansas State University, did agronomy research for years before starting a wholesale horticulture business. My company, Prairie Flower Creations, grew and dried flowers, ornamental corn, and mini pumpkins for the florist trade. In 1990 I was featured in Country Woman Magazine, but at the same time, my husband's job was transferred to California. I sold my business and tried to cope, growing flowers and pumpkins in five-gallon buckets on our cement lawn. I started writing about the family and farmland I was homesick for and started a new career, writing about women ancestors who had moved to the new state of Kansas and farmed its land. We eventually moved back to Kansas, bought land next to my family, raised buffalo, and I have a garden again. So not only have I fulfilled my dream to be a farmer, I've written about past and present women that have also tilled the prairie land of Kansas. Please read and enjoy my book series which are about the family that homestead our family farm, and my ancestors that homesteaded in Kansas in the 1800s. Considered historical fiction, these quality paperback books are age appropriate for everyone from age 9 to 99. Book, quilt, and Scandinavian gift shops sell them (or ask your local store to stock them for you) and schools use them in class studies to portray early pioneer and Kansas history. My writing time most days is spent on the computer with marketing my businesses, and working on the next book series.
