**WE ARE CLOSER TO WORLD WAR III TODAY THAN MOST WOULD IMAGINE** The facts and knowledge in this book are powerful enough that it has been under attack. Some angry individuals have left numerous fake one-star reviews. Many are missing the words "Verified Purchase" and the reviewers make claims that have nothing to do with the book's actual contents. In all likelihood, they didn't even read the book. Unfortunately, there are still those in our great country who cannot accept an opinion that deconstructs the common, agenda-driven, media-controlled narrative about Russia. Some are too driven by anger and Cold War stereotypes to tolerate rational intellectual discourse on Russia. Today it's time to put hurt feelings aside and talk facts and pragmatism that is vital to American national security and prosperity. This book's growing popularity may even be frightening some people as they see their power slipping. The American public is hungering for a different perspective on Russia, globalism, and foreign affairs. More and more people are waking up to see a different reality than the lies that have been broadcast to them for years on CNN, the Washington Post, the New York Times, etc. The elites are losing control of the narrative, their media has next to zero credibility, and now they are scared. The "Russia election hacking" claims (still backed by zero evidence as of January 2017) reflect the newest attempt to ruin a potential "detente" between the United States and Russia. Will the war party succeed in their efforts to demonize Putin's Russia so that Trump's hands are tied (all at the expense of American national security)? They certainly get an A for effort. With the recent Donald Trump election, the game has changed and time will tell what his presidency will bring about. However, for the bulk of 2016, the United States and Russia had been steadily drifting towards nuclear war. In fact, many experts contend that 2016 brought our countries closer to war than we had been at any point in history (including the Cuban Missile Crisis). According to Vladimir Putin- as well as numerous international experts- a global nuclear showdown is becoming increasingly likely. A lack of cooperation between US and Russia in safeguarding nuclear materials is also increasing the risk of terrorists like ISIS conducting a dirty bomb attack in Europe. Is it all because of Putin and "Russian Aggression?" This book will delve deep into that topic with the average reader in mind. It is written in plain language, concise, captivating, and guaranteed to provide you with a new perspective that you will never see in the mainstream media! You're about to discover the reality about Russia that media and politicians don't want you to know. Too much is at stake for you and your family to continue being told exactly what to think by the people in power as a war with Russia becomes more and more likely. It's time to act like your family's future depends on understanding the truth. Because it does. Here Is A Preview Of What You'll Discover... How defense contractors may be controlling our politicians How worsening US-Russia relations could hurt EVERY American financially The Truth about NATO and Ballistic Missile DefenseAn objective analysis of Vladimir PutinInsights into the 2016 election that you won't find on CNN, Fox News, MSNBC, or virtually anywhere elseThe truth about the Ukraine CrisisA comprehensive analysis of the events that led America and Russia to get to Cold War 2.0 that could turn into hot war any dayAnd Much, much more! "This book is both remarkable in analysis and timely in approach. The author does a great job of cutting through the American Media Propaganda Machine and examining US and Russian actions since the collapse of the Soviet Union."- D. Buxman (Top 500 er)
