Charles Le Quesne : **Quseir: An Ottoman and Napoleonic Fortress on the Red Sea Coast of Egypt (American Research Center in Egypt Conservation)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Quseir: An Ottoman and Napoleonic Fortress on the Red Sea Coast of Egypt (American Research Center in Egypt Conservation):

1 of 1 people found the following review helpful. Five StarsBy Marino Viganòperfect

This volume presents the results of recent archaeological and historical studies of the Ottoman fort of Quseir, which was Upper Egypt's only direct outlet to the Red Sea at that time. Illustrated with over 100 maps, drawings, and photographs, this groundbreaking study examines a key example of Ottoman-era material culture in Egypt. With contributions from seven historians and archaeologists, Quseir traces the development and history of an important Ottoman fortress, built near an abandoned medieval port. Its establishment was part of a constant struggle by the Ottoman state to maintain control of the desert and the routes across it. Studies of the archaeological remains from the fort reveal the presence of reused stones from a Greco-Roman temple and emphasize its key role as a regional grain entrepôt and port of embarkation for Muslim pilgrims on the way to Mecca. Quseir is a portrait of a place at the boundary of two powerful cultural and economic systems. While serving as an outlet for the pilgrims and produce of Upper Egypt, Quseir also played a role in the distinctive maritime culture of the Red Sea. This study also reveals in detail for the first time the story of the struggle between the British and French for control of Quseir during the Napoleonic occupation of 1798-1801. American Research Center in Egypt Conservation Series 2

About the Author CHARLES LE QUESNE, a professional archaeologist based in the United Kingdom, worked on a series of fieldwork and conservation projects in Old Cairo/Fustat in the 1990s. He is presently studying for a PhD on the archaeology of the medieval Red Sea at Southampton University.
