It came in great conditions and at a low price; it was a great choice to buy it from here, unlike the college bookstore where at times, they have used books on sale, but under bad conditions and at a high price.0 of 1 people found the following review helpful. excellentBy Donthe boook is very good and I am very satisfied with the purchase. Kitano wins the raceBy Dr. Bill SmallmanI use this textbook with grad students in seminaries for designing interethnic ministries, largely African-American and Euro-American students. Kitano's exposition of principles and cases of racism provides

an excellent backdrop for dealing with current situations in new churches in various societal settings, together with other textbooks.

Kitano uses his own experiences as a Japanese American—including growing up in a World War II concentration camp—as one motivation behind this book. He views race relations from an Asian-American perspective so that many of the models and explanations are drawn from his own experiences.
