"Any high school to college-level library strong in American history will find this an excellent blend of essays and documents charting the experiences of a wide range of ordinary Americans in the South. A top pick for any collection strong in Civil War era history." - Midwest Book "An overview discusses the social, economic, and political challenges of rebuilding the South with emphasis on the lives of everyday people and a brief historiography of Reconstruction. Following that, eight essays explore topics related to Reconstruction, including the meaning of freedom for African Americans, white women's changing roles, African Americans living in Southern cities, northerners in the South, former slaveholders' and planters' places in the new society, and Native American issues. Articles contain in-text citations; black-and-white photographs, political cartoons, and reproductions; sidebars; and combined lists of references and suggestions for further reading. The 16 primary-source documents include first-person reminiscences, newspaper articles, letters, and the transcript of testimony before the Joint Select Committee to Inquire into the Condition of Affairs in the Late Insurrectionary States. It is interesting to note that all but one of the essayists teaches in the United Kingdom. The writing makes this volume best suited for advanced students." - School Library Journal
