Piotr Butowski : Russia's Air-launched Weapons: Russian-made Aircraft Ordnance Today before purchasing it in order to gage whether or not it would be worth my time, and all praised Russia's Air-launched Weapons: Russian-made Aircraft Ordnance Today:

0 of 0 people found the following review helpful. If you have any interest in modern Russian warplanes, ...By F-111AIf you have any interest in modern Russian warplanes, this book is a must-have. The author, Piotr Butowski, is famous for his many works regarding Russian aircraft, and this book compliments those works. Included in the book are the entire range of weapons carried by Russian aircraft, including all air-to-air, air-to-ground ordnance, rocket pods, jammer pods, and glimpses of future ordnance. This book should be in the collection of everyone who is

interested in modern Russian aviation.0 of 0 people found the following review helpful. Great value for money and just as ordered!By DefenderDMGreat value for money and just as ordered!0 of 0 people found the following review helpful. Great books, very niceBy IVFarmboyVery informative

This latest volume in Harpia's new-look format continues the publisher's aim of providing unrivalled detail and accuracy in its coverage of lesser-known areas of air warfare research. Following Harpia Publishing's acclaimed two-volume series *Russia's Warplanes*, author and researcher Piotr Butowski sheds light on the full range of air-launched ordnance of Russian origin that can be found in large-scale service today. This unique reference work provides a wealth of information - most of which has been gained from first-hand and internal industry sources - on the full spectrum of Russian aircraft-launched weapons. Supported by newly commissioned artworks and extensive specification tables, chapters describe in detail air-to-air missiles, air-to-surface missiles, guided and free-fall bombs and cluster munitions, rockets, as well as aircraft guns. Also included are the range of strategic munitions currently fielded or in development for the Russian Air Force, including cruise missiles and nuclear bombs. Addressing a previously neglected field within aerospace research and publishing, *Russia's Air-launched Weapons* will appeal to aircraft and weapons enthusiasts and conflict researchers alike. This latest volume in Harpia's new-look format continues the publisher's aim of providing unrivalled detail and accuracy in its coverage of lesser-known areas of air warfare research.

"This compact compendium – and both volumes of Butowski's *Russia's Warplanes: Russian-made Military Aircraft and Helicopters Today* – deserve pride-of-place in the reference libraries of aircraft hobbyists, aviation historians, journalists and, yes, even intelligence analysts." " (Cybermodeller)"This is a worthy study, useful for any Russian aircraft modeller." (Airfix Model World)About the AuthorPiotr Butowski is an aviation journalist, writer and photographer specialising in the aviation of Russia, especially the themes of aerospace industry and technology. Since 1978 he has published several thousand articles in aviation magazines all over the world, mainly in Poland, the UK, France and Germany, but also in Brazil, the US, Japan, Spain, Italy, Russia and other countries. He is author of around 15 books on Russian aviation published in Poland, the US, the UK and Hong Kong between 1985 and 1996. After a break of almost 20 years, he wrote the first volume of the *Russia's Warplanes* series last autumn.
