**Alena V. Ledeneva : Russia's Economy of Favours: Blat, Networking and Informal Exchange (Cambridge Russian, Soviet and Post-Soviet Studies)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Russia's Economy of Favours: Blat, Networking and Informal Exchange (Cambridge Russian,

Soviet and Post-Soviet Studies):

This book examines the little-known phenomenon of blat--the use of informal contacts and personal networks to obtain goods and services under the rationing that pervaded Soviet Russia. Alena Ledeneva analyzes the historical, socioeconomic and cultural aspects of blat, and explores its implications for post-Soviet Russia. The political and economic reforms introduced since the collapse of the Soviet Union have radically affected everyday practices, but an understanding of blat remains crucial for interpreting the social, economic and criminal problems that affect the development of a market economy in post-Soviet Russia.

"The book represents a significant new stage in research by scholars trained in Russia." Michael Paul Sacks, *The Russian* "Ledeneva's analysis is careful, well-presented, subtle, and intelligent." *Slavic* "Russia's Economy of Favours makes a valuable contribution to our understanding of the late Soviet period, of the informal side of Soviet society, and of the social effects of the collapse of the Soviet union." *Journal of Modern History*
