McDowellShipcraft publishes a great series of titles with brief histories and then really excellent kit reviews (even kits from the 50s 60s). Highly recommended.0 of 0 people found the following review helpful. Five StarsBy Klaus WalløeJust a very goos book1 of 1 people found the following review helpful. Five StarsBy Daris LongVery pleased, fast delivery, as advertised.

The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeler through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring color profiles and highly-detailed line drawings and scale plans. The modeling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references – books, monographs, large-scale plans and relevant websites. This volume covers the famous German sister-ships whose fates were so very different - Bismarck had a short but glorious career, first sinking HMS Hood and then in turn being sunk by the Home Fleet, whereas the Tirpitz spent most of the war skulking in Norwegian fjords, fending off attacks by midget submarines and carrier aircraft before being finally sunk by enormous specially designed bombs dropped by RAF Lancasters.

About the Author STEVE BACKER is the editor of steelnavy.com, the best warship modeling site on the web, for which he writes extensively on warship kits and accessories. He is also the author of five previous titles in this ShipCraft series, the most recent being Admiral Hipper Class Cruisers.
