John W Perrine : The Ears of America: Electronic Spying in the Korean War before purchasing it in order to gage whether or not it would be worth my time, and all praised The Ears of America: Electronic Spying in the Korean War:

0 of 0 people found the following review helpful. As described. Arrived promptly. Interesting book.By moneymanAs described. Arrived promptly. Interesting book.0 of 0 people found the following review helpful. An excellent hands on storyBy Laura RozitisA book about the Korean war conflict written by someone who had an interesting story to tell

through a direct experience. The book is excellent as it neither villifies this conflict or glorifies it. The personal touch of how he arrived at this point from a child also provided a nice background to how they arrived at this particular experience in his life. Great add is that this book included a number of actual pictures of his time in South Korea.

The Ears of America is the personal story of a young man's journey from a small New Jersey town to the Cold War conflict of Korea. More than merely a battle of geography, Korea became a clash of two opposing ideologies: democracy and communism. This book provides a first hand look into the daily operations of the Army Security Agency and the soldiers charged with intercepting enemy transmissions in order to stay one step ahead of their foes. The book tells of the important role played by South Korean and UN forces; the critical services provided by the air force, artillery, engineers, and many other supporting units; and of the psychological warfare that was being waged by both sides. The conflict in Korea transitioned the world into a new era. The Ears of America details the bravery of those involved in this war; a war that has yet to officially end.

About the Author The author is a retired research scientist, with a PhD in Life Science. His previous publication was Dare To Question, a critique of Christian concepts. The author enlisted in the Army Security Agency during the Korean War, and spent a year involved in the electronic interception of enemy field transmissions. This was followed by a year with an intercept unit that monitored worldwide transmissions.
