**Ruth Tenzer Feldman : The Korean War (Chronicle of America's Wars)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Korean War (Chronicle of America's Wars):

1 of 1 people found the following review helpful. not bad. easy to read. By Preppy S. I like to read these kinds of juvenile history books. they are easy to read, have all the basic information, so you can get a general idea in a short time. I like this book overall, however, it has a few problems. 1. It didn't have a pre-war map. The maps are scattered in the book. The first map in the book is actually a map after 1953. The book mentioned quite a few places but some of them are not noted on the map. 2. Mao Zedong's son's name is mao anyin, not mao anyang. 3. It claimed that twenty-one nations in the UN agreed to defend south korea, and "the UN asked president truman to appoint a military leader." It sounded like as if the entire world was supporting this war. To me, it was the other way around. UN at that time was just like a puppet to the USA government. That is why the majority of the soldiers were all from the USA, but not from other countries combined. And in this book, it has never mentioned anything from any other participating UN countries' leaders response to this war, and how they want to finish this war, etc. All it talks about was the USA

government, the US military leaders, etc. 2 of 2 people found the following review helpful. This is a great series of books. By M. Smith We homeschool and wanted to study in depth the Korean War, Cold War, and Vietnam War. Chronicles of America's Wars are a great resource. They are easy reads with lots of impact, info, and maps. We used them alongside Joy Hakim's A History of the U.S. series and also used selected biographies. Very well written; nice pictures; and also timeline and vocabulary and list of major players of each war, and list of internet resources are in the back of the books. We'll purchasing the rest of the series.

Book by Feldman, Ruth Tenzer

From Booklist ed with Josepha Sherman's The Cold War. Gr. 6-12. These titles in the Chronicle of America's Wars series offer concise, well-written overviews of two important twentieth-century conflicts. The Korean War begins briefly with the events that led to Korea's division before focusing in greater detail on North Korea's invasion of South Korea. The author offers good overviews of the roles of the major players, and she outlines the significant battles and campaigns, and the lengthy negotiations that resulted in armistice. Also mentioned are the roles that minorities and women played in the war. The Cold War examines armed conflicts and political battles within the 50-year power struggle between the Soviet Union, the U.S., and their respective allies. Events discussed include the Korean and Vietnam wars, the Cuban Missile Crisis, and the Soviet invasion of Afghanistan. The book concludes with Mikhail Gorbachev's rise to power and the dismantling of the Soviet Union. Both books are abundantly illustrated with color and black-and-white photographs as well as maps. Appendixes include a bibliography, endnotes, a glossary, and a time line. Ed Sullivan Copyright © American Library Association. All rights reserved
