ScarboroughA very good book; essential reading for Constitutional and conspiracy buffs; although pricey, it's worth getting. As a companion (larger) volume, get the actual trial transcripts, amazingly thorough in a month and a half with eight defendants.

The eight people charged with conspiring to assassinate President Abraham Lincoln were tried by a military commission under military law. The author contends that this was illegal, since the civilian legal system was fully functioning. The many ways in which the defendants' rights were violated are described, as are the ways in which the trial testimony was either not accurate or not legally obtained. The trial is also compared with other incidents in which the U.S. military was used in police and judicial functions, with questionable results. The book is a warning against unchecked power by the executive branch of the government.

"The details and consequences are expertly laid out in this book by Mr. Hatch, making the reader stop and consider how far a government can go at times of national crises." --Laurie Verge, Director, Surratt House Museum, Clinton, Maryland
"Fred Hatch pulls no punches in presenting the trial of the Lincoln Assassination conspiracy. He presents his arguments forcefully, and carries them forward to contemporary issues, such as dealing with military commissions for the trial of terrorists." --Arthur T. Downey, Georgetown University
"Frederic Hatch knows more about the assassination than most. This is why his latest book is a wonderful and useful companion to the ever growing literature about this game changing event." --Frank J. Williams, retired Chief Justice of the Rhode Island Supreme Court.
